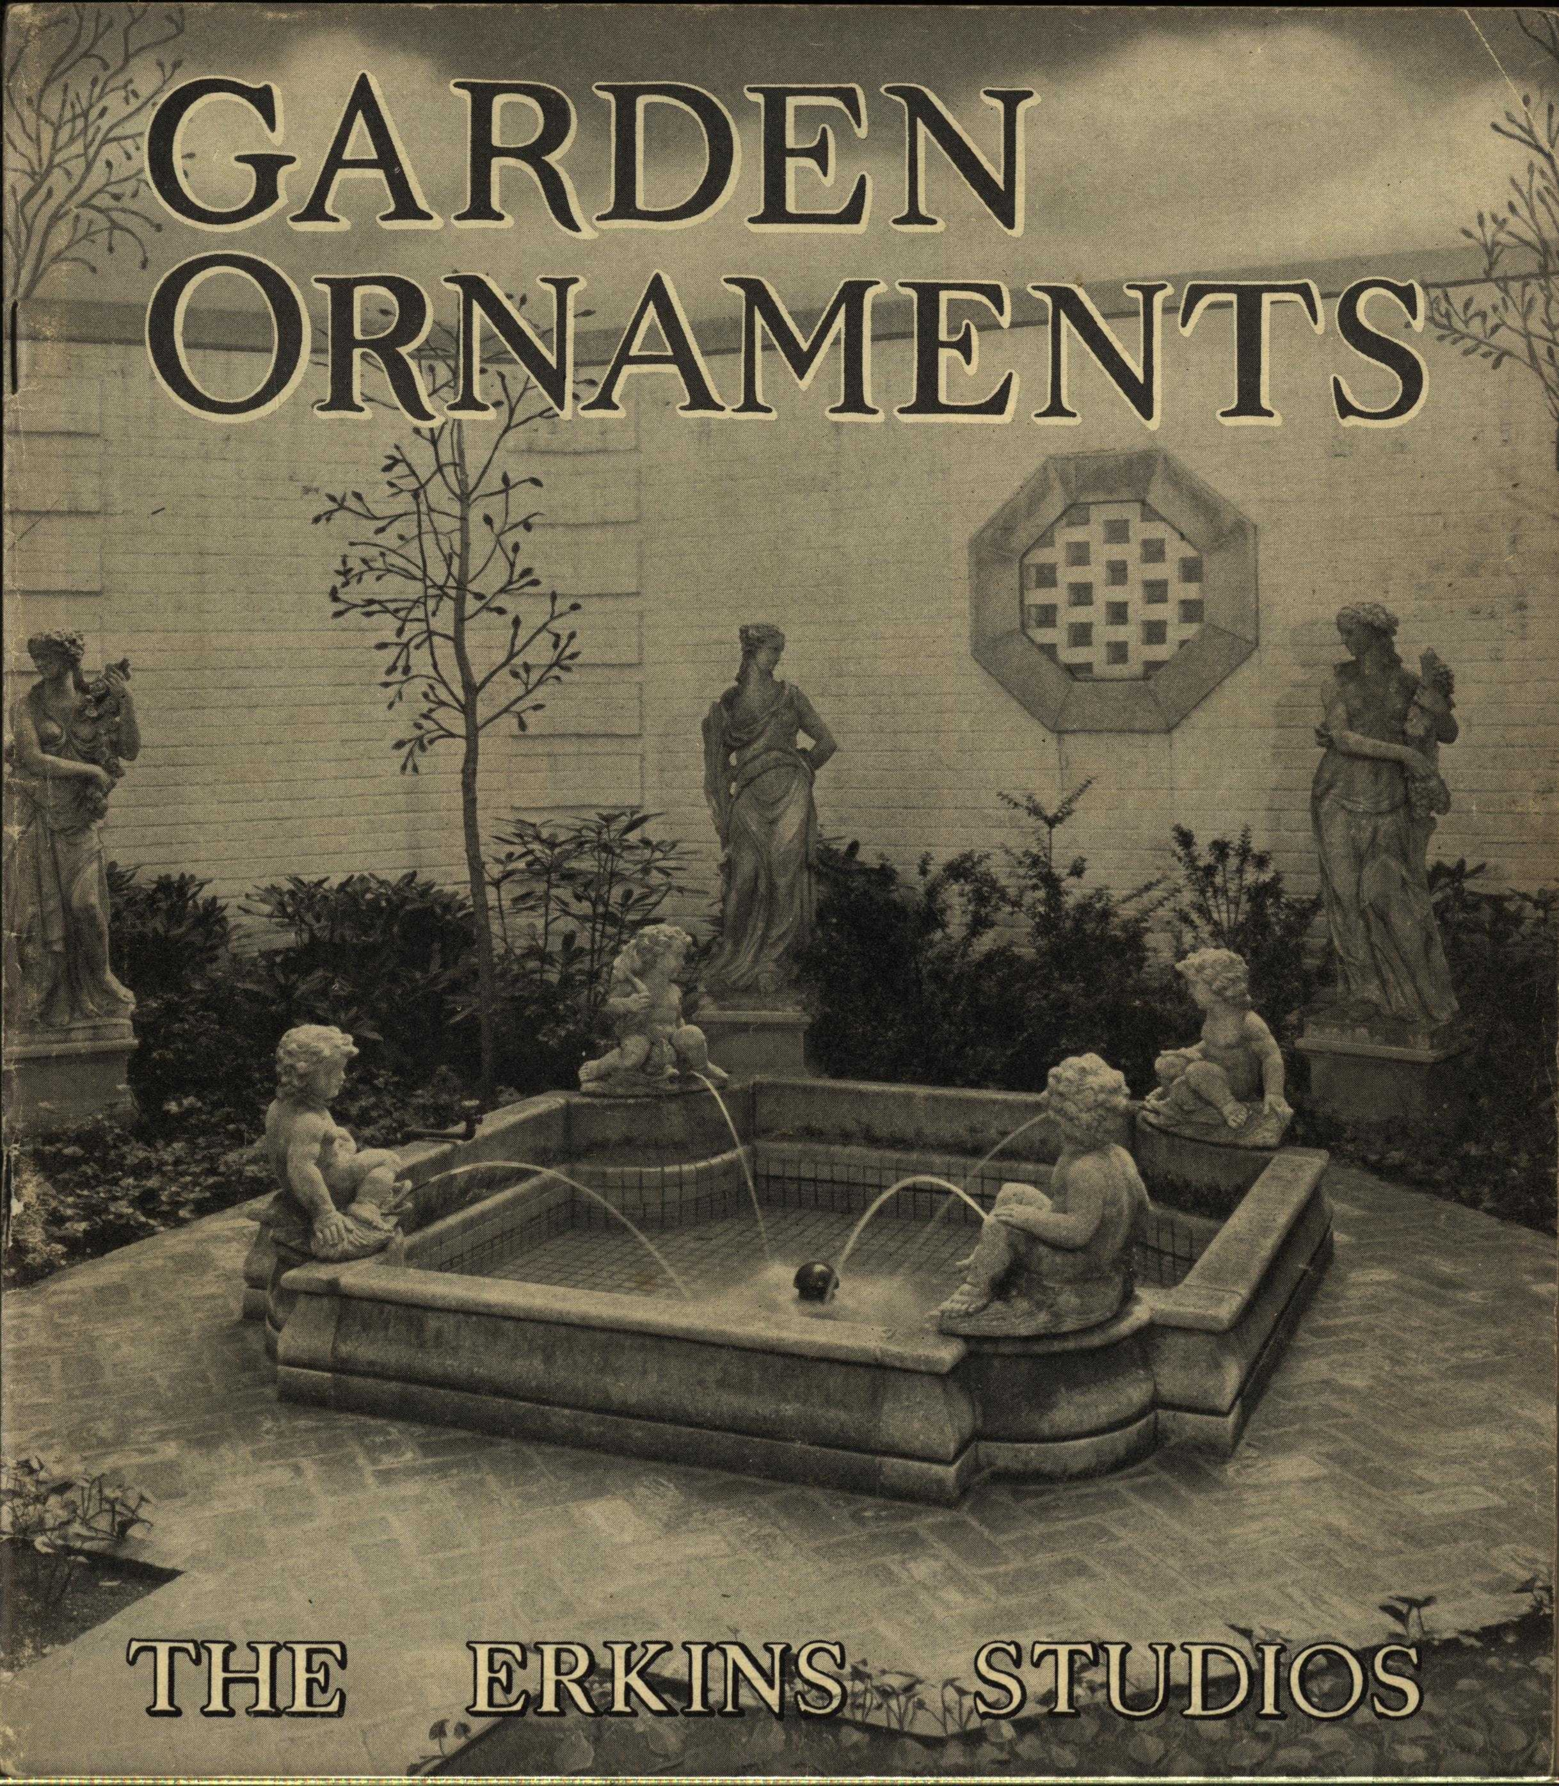
GARDEN ORNAMENTS



THE ERKINS STUDIOS

THE FORMAL GARDEN depends upon Garden Furniture for many of its effects. So, too, the beauty of the informal garden can be greatly enhanced by the use of a piece of two of ornament.

This catalogue illustrates some of the more popular designs in our collection, which includes Italian Marble, English Lead, Bronze, Imported and Domestic Terra Cotta (both glazed and unglazed), and our Pompeian Stone— a composition which resembles grey Indiana Limestone in color, texture and durability. There are hundreds of other models in stock, and we shall be glad to send additional illustrations if you will tell us about your requirements. We have the facilities to produce special work and will gladly furnish estimates for executing your own designs, or will submit special sketches for your approval.

A few of the special orders by ERKINS STUDIOS are illustrated on the last page of this catalogue.

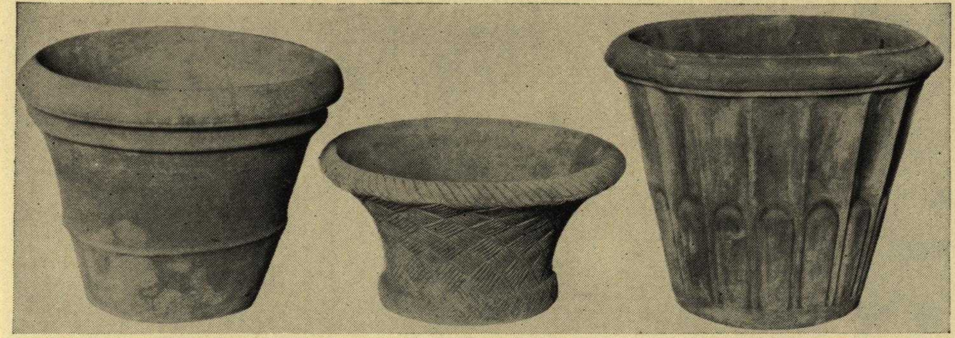
ITALIAN TERRA COTTA

The crude pottery from the Fabriques in the vicinity of Florence has happily found its way to this country, where its soft color, ranging from deep cream to light red, has added charm to many of our gardens. The texture is rough and these designs are among the best shapes.



Italian Terra Cotta Pots

WALL FOUNTAIN
INNOCENTI & WEBEL, Landscape Architects

SPECIAL ORDER DEPARTMENT

For fifty years a very important function of the ERKINS STUDIOS has been the designing of special garden features in collaboration with outstanding Landscape Architects, Architects, and Decorators in the execution of their own designs for some of the loveliest gardens in this country.

We are fully equipped to execute work in Pompeian Stone (a composition resembling limestone), real stone, marble, lead and bronze, and our Special Order Department will be happy to estimate on your special designs, or to submit sketches of ornaments in keeping with your own ideas.
